Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Canter et al. (U.S. Patent # 5,359,280).

Canter et al. disclose the claimed invention a power regulator (figure 2-5), a linear control circuit (figure 4, item 108), the output terminal of the amplifier is electrically connected to an inverting input terminal (figure 4, item thru 109) and a synchronous pulse width modulation circuit (claim 13).

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2838

4. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Canter et al. (U.S. Patent # 5,359,280) in combination with Burkhart (U.S. Patent # 6,777,653) Canter et al. disclose the claimed invention as explained in the claims 1-4, above, except the utilization of the technique for an asynchronous pulse-width-modulation circuit. Burkhart teaches the utilization of the similar technique for an asynchronous pulse-width-modulation (column 2, line 10-15). It would have been obvious one having an ordinary skill in the art at the time invention was made to modify Canter et al.'s power converter by utilizing the technique taught by Burkhart for the purpose of reducing potential interference such EMI.
